

Weekly Report for Week Ending 02/08/2013

IBM - OpenStack

Justin Anderson, John Nagel, Cesar Ramirez, John Rensberger

Status Summary

This week we changed repositories from SVN to Git and have it fully working within Trac. We also completed our specifications document and had it approved by IBM. However, the document is likely to be revised as some of our requirements are going to be changing to align more closely with our mentor's goals. We've now had three meetings with IBM and our primary mentor has been unable to attend all of the meetings. He is hoping that next week he can attend and will go over more definitive and achievable goals with us. We sent out an email on Monday to the department faculty and staff to find their interest in OpenStack. We've already had one meeting with Dr. Simone Ludwig and have started discussing different storage capabilities of the cloud. We also obtained some more physical hardware from the department to be used as a test environment.

Top Highlights

- Completed the Requirement Specification document.
- Obtained physical hardware for building a test environment.

Top Lowlights

- Our mentor was once again in meetings this week and was unable to meet with us.

Accomplishments vs. Plan

- Accomplishment - Switched Repository to Git
 - Owner: Cesar
 - Status: Complete, the switch was made last weekend and everyone has been committing to it already.

- Accomplishment - Completed Requirements Specifications
 - Owner: Team
 - Status: Complete
- Accomplishment - Tested DevStack
 - Owner: John and Team
 - Status: Complete, we installed DevStack to demonstrate OpenStack in our class presentation. John set it up on one of his VMs and we were able to configure two OpenStack VMs. This gave us an idea as to how robust installation scripts can be and what basic functionality is like.
- Accomplishment - Project Presentation
 - Owner: Team
 - Status: Complete
- Accomplishment - Contact faculty about utilizing OpenStack in research projects
 - Owner: Team
 - Status: Ongoing. An email was sent to the department faculty on Monday, and so far we have received two responses. We were able to meet with several faculty and plan to meet with several more next week.
- Plan - Continue faculty outreach
 - Owner: Team
 - Status: Ongoing
- Get a working OpenStack instance running
 - Owner: Team
 - Status: Cesar is building a cloud on VMs of his own hardware and is working on a script similar to DevStack that he has on GitHub. John also has his own VMs that he's planning to get a test environment running on within the next week.

Goals for Next Week

- Complete High-Level Document
 - Owner: Team
- Continue faculty outreach
 - Owner: Team

Risks

ID#	Status	Risk	Owner	Probability / Priority	Impact	Trigger	Recommendation / Resolution
R001	Incomplete	Unable to complete design document	Team	100%/Medium	Will set back our progress	Decision with team and mentors during next meeting	Waiting for direction from mentor

Issues

ID#	RID#	Status	Issue	Owner	Due Date	Impact	Recommendation / Resolution
I001		Resolved on 02/05/2013	Need access to more hardware	Team	02/05/2013	Having more hardware will provide us a system that is in a controlled environment	Contact Robert

Project Success Indicator	02/ 01	02/ 08	02/ 15	02/ 22	03/ 01	03/ 08	03/ 15	03/ 22	03/ 29	04/ 05	04/ 12	04/ 26	05/ 03
Planned milestone events are being met	OK	OK											
Budget is under control	OK	OK											
Quality control results are within specifications	OK	OK											
Change control process indicated minimal requests for change	OK	OK											
Project resources are being supplied per schedule and skill levels are adequate	OK	OK											
Project team appears to be cohesive and reasonably happy	OK	OK											
Users seem satisfied with progress of the work	OK	OK											
Top management remains visibly supportive of project goals	OK	OK											
Third-party vendors are delivering quality items on schedule	OK	OK											
Risk events are under control and nothing unusual is appearing	OK	OK											
Project training program is progressing according to plan	OK	OK											
Relationships with support groups appear to have no identifiable issues	OK	OK
