Hey guys,

I hope you have a chance to read through these documents before our meeting in the morning. We've included a very rough outline of some use cases and we'd like your input on how we should develop them further.

Thanks and we'll talk soon,
John

Hey Michael, Lance, Adam, and Matt,

I just wanted to remind you that we turned in our infrastructure design document yesterday, however we still need an email indicating approval. Dr. Knudson said he just needs a copy of an email, so you can reply to this one with approval and we'll forward it on or simply copy him as well and that'll count.

I've also given you all access to our Google Drive folder using your Gmail handles, minus Matt as I don't know it. You all should have edit permissions to allow you to add comments on any documents too.

Thanks!

John

Hey everyone,

Just had a chance to do a final readthrough of the System Design Document and it looks good overall. There are a few minor things we can discuss when we meet on Tuesday but there are no pressing changes to be made. Unless Matt, Lance, or Michael have any unvoiced concerns at this point, your System Design Document is approved.

Regards,
