

What we're doing this week:

- LDAP to Horizon
- Try to stick with SSH key authentication
- Documentation
- Images

Presentation:

- Maybe create a network diagram
- Show off the work we've done with Hadoop
- Draft a flow of the presentation
  - Include how OpenStack works
  - Include services
  - Include architecture diagrams
  - Include diagrams of the instances running within OpenStack and how they fit in with the overall OpenStack architecture

Capstone course closure:

- For video presentation
  - Maybe do two videos
  - One for basic use
  - Another for Hadoop, perhaps for Dr. Denton

Savanna

- How to get dataset in?
- Add some scripting to Savanna to bring in data from URL?
- Is there an easy way to pass user data through cloud init?
  - Just have it download the data and job to save the manual steps

We will do a Google+ Hangout on Monday 4/29

- Send Michael a link so he can try this
